PERSONAL INFORMATION

Nationality: Indian

Marital Status: Single

Driving License: UAE

Date of Birth: 18 May 2001

Visa Status: UAE Resident Visa

Availability: Immediate

SUMMARY

Data Science graduate (M.S., University of Texas at Arlington, 2025) with hands-on experience building end-to-end data pipelines, machine learning models, and computer vision systems. Proficient in Python, SQL, PySpark, Great Expectations, and cloud platforms including AWS and GCP. Experienced in data quality engineering, object detection, time-series forecasting, and consumer segmentation. Seeking roles as a Data Analyst, Data Engineer, Data Scientist, or Machine Learning Engineer.

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, Scala, Java, C, C++

Machine Learning & AI: Scikit-learn, TensorFlow, PyTorch, XGBoost, YOLOv8, OpenCV, Computer Vision, Object Detection, Pandas, NumPy, Feature Engineering

Data Engineering: Apache Spark, PySpark, PyDeequ (AWS Deequ), Great Expectations, Kafka, Airflow, dbt, Hadoop, CI/CD Pipelines

Cloud Platforms: AWS (Glue, S3, EMR), Google Cloud Platform (BigQuery, Dataflow), Azure, Docker, Kubernetes

Databases: BigQuery, PostgreSQL, MySQL, MongoDB

Data Visualization: Power BI, Tableau, Looker (LookML), Matplotlib, Seaborn, Google Data Studio

Tools: Git, GitHub Actions, SQLAlchemy, Airtable, Jupyter, VS Code, Google Analytics

EXPERIENCE

ML Engineer Intern

Jun 2026 – Present

Dezzex Technologies | *Dubai-based Computer Vision and Agentic AI company*

- Undergoing structured technical training in computer vision and object detection, focusing on image detection model development for deployment in live CCTV video analytics pipelines.
- Exploring and evaluating deep learning architectures including YOLO-based models for real-time object detection in video surveillance contexts, aligned with Dezzex's city monitoring and video intelligence product suite.

Volunteer Data Analyst

Nov 2025 – Present

Big Sister Little Sister | *Non-profit mentorship organization dedicated to empowering young women*

- Evaluated Airtable as a data management platform for BSLS operations, assessing integration capabilities, workflow compatibility, and scalability to support organizational growth.
- Leading end-to-end data lifecycle management including requirements gathering, data process design, and implementation of structured reporting workflows to strengthen organizational accountability.
- Supporting development of operational dashboards to track program metrics, enabling leadership to monitor mentorship outcomes and make data-driven decisions.
- Establishing data quality standards and reporting frameworks to ensure consistent, accurate information management as the organization scales.

Research Assistant

Jan 2025 – May 2025

University of Texas at Arlington | *Public research university, ranked top 200 in the US for Data Science*

- Designed and deployed an interactive Python and Tableau dashboard to visualize ~100K ERCOT grid data points, covering power generation by fuel type, consumption patterns, system frequency, and locational marginal price movements.
- Aggregated 10+ years of ERCOT API and government data, consolidating terabytes of records to track grid reliability, outage events, and pricing trends across Texas.
- Applied time-series analysis in Python to model energy production, consumption, and grid stability patterns, achieving 95% forecast accuracy and enabling proactive decision-making.

Data Analyst Intern

Jun 2024 – Jul 2024

Cardinality AI | *US-based AI analytics startup specializing in consumer intelligence and predictive modeling*

- Developed and deployed machine learning models that improved predictive analytics accuracy by 20% and enhanced consumer segmentation across 100K+ customer records.
- Built interactive Power BI dashboards visualizing millions of data points, reducing stakeholder insight generation time by 30%.
- Consolidated and processed data from multiple sources using Python and SQL, identifying key patterns and optimizing data pipelines to increase team productivity by 40%.

Student Intern

Aug 2022 – Sep 2022

GAVS Technologies | *India-based global IT services company with 3,000+ employees across 10+ countries*

- Fine-tuned ML models using Scikit-learn and TensorFlow, achieving a 15% increase in model accuracy and 20% reduction in training time.
- Engineered data preprocessing pipelines and feature extraction workflows that improved data quality and model performance by 12%, cutting processing time by 25%.
- Delivered project findings on schedule, contributing to 95% on-time delivery and integrating analytical insights into company decision-making processes.

PROJECTS

Medicare GX Data Contracts | *Python, Great Expectations, Pandas, PostgreSQL, Docker, SQLAlchemy, GitHub Actions*

- Enforced data quality contracts on the CMS Medicare Physician & Other Practitioners 2023 dataset (10M+ provider records) using Great Expectations 1.15.1 across dual execution environments: Pandas (CSV) and PostgreSQL.
- Implemented 20+ typed expectations across 7 quality dimensions — schema validation, null checks, type enforcement, NPI format validation, range constraints, categorical state validation, and row-count volume checks.
- Built a CI/CD pipeline with GitHub Actions that automatically fails the build on any broken expectation and auto-generates browsable GX Data Docs HTML quality reports on every run.

Data Quality Validation Pipeline | *Python, PyDeequ, PySpark, AWS Deequ, Matplotlib*

- Built an automated data quality validation pipeline using PyDeequ (AWS Deequ) and PySpark to validate 3–4M rows/month of NYC Yellow Taxi trip records across multiple data quality dimensions.
- Implemented 12 constraint checks covering fare amounts, trip distances, timestamps, and passenger counts; performed column profiling and month-over-month drift detection across 3 months of data.
- Documented a production-ready AWS Glue migration path, mapping the Colab-based pipeline to an S3-backed metrics repository architecture for billion-row scale deployment.

EDUCATION

Master of Science in Data Science

Aug 2023 – May 2025

University of Texas – Arlington, USA

GPA: 3.61 / 4.00

Bachelor of Technology in Computer Science and Engineering

Jul 2019 – May 2023

Vellore Institute of Technology, Chennai, India

GPA: 8.07 / 10.00
